The Board of Trustees of St. Petersburg College affirms its equal opportunity policy in accordance with the provisions of the Florida Educational Equity Act and all other relevant state and federal laws, rules and regulations. The college will not discriminate on the basis of race, color, ethnicity, religion, sex, age, national origin, marital status, sexual orientation, gender identity, genetic information, or against any qualified individual with disabilities in its employment practices or in the admission and treatment of students. Recognizing that sexual harassment constitutes discrimination on the basis of sex and violates this Rule, the college will not tolerate such conduct.

Data and information contained herein cannot be used without the express written authorization of St. Petersburg College. All inquiries about the use of this information should be directed to the Executive Director of Institutional Research and Effectiveness at St. Petersburg College.

Executive Summary

Introduction

The evaluation and assessment processes at St. Petersburg College (SPC) are centered on mission-driven outcomes in program and service areas. Analysis of outcome results is ongoing and captured in various assessment reports. Institutional effectiveness at SPC assesses all degree programs and courses, regardless of mode of delivery.

Graduating Student Survey

The Graduating Student Survey (GSS) is part of a comprehensive college-wide assessment program developed to examine the demographic profile of the responding graduates, assess their perceptions of the educational experience at the College and determine how the educational process at the College has changed their behavior and/or their knowledge as it relates to some specific areas of inquiry (educational outcomes).

In 2010, an overall evaluation of the number and types of questions that students were asked upon graduating from the institution was conducted, resulting in revisions to the GSS. The new GSS is embedded in the graduation application process, and aligned with the Entering Student Survey which was revised in 2008. In an effort to minimize the overall number of questions and reduce duplication, demographic information is no longer being asked within the GSS. The demographic information for the survey was extracted from PeopleSoft, the student database system, as part of the graduation application process. The GSS was available to students applying for graduation on-line during all three terms of academic year 2013-14. Two-thousand and eighty-two students completed the survey.

Student Demographic and Academic Information

The demographic profile and academic background of the 2,082 survey respondents (N) to the Graduating Student Survey are summarized below:

- □ The largest age category for survey participants was "20 24" (29.2%), while forty-two percent (42.3%) of survey respondents were 30 and older. By comparison, the percentage of SPC students who were 30 and older, was about thirty-six percent (35.9%) at the end of the fall 2012 semester [Source: 2013-14 Factbook, Table 20].
- Over two-thirds (67.9%) of the survey respondents were female. This is slightly higher than the percentage of actual female completers (61.2%) for 2012-13 [Source: 2013-14 Factbook, Table 27].
- □ About sixty-nine percent (68.7%) of the respondents were "White." About eleven percent (10.6%) of the responding students were "Hispanic" and about ten percent (9.9%) were "Black/ Non-Hispanic." These percentages were similar to actual completers for 2012-13 [Source: 2013-14 Factbook, Table 27].
- □ Almost half (47.4%) of the respondents indicated that they were completing an associate of arts degree. About twenty-seven percent (26.6%) of the students reported completing a baccalaureate degree, about eighteen percent (17.8%) an associate of science degree, and almost five percent (4.6%) a certificate program as the degree they are applying for at SPC.
- □ Almost three-quarters (72.4%) of respondents stated that they "Fully" achieved their educational goal while at the College. An additional twenty-seven percent (26.6%) stated that they "Somewhat" achieved their goal

2013-14 Graduating Student Survey Report Institutional Research and Effectiveness

Almost two-thirds (60.9%) of respondents indicated that they planned to continue
their education. Of those, most indicated they would be going on to an "In-state
public College/University," most commonly the University of South Florida
(23.7%), followed by "SPC Baccalaureate Program" with ten percent (10.3%).

☐ Three percent (3.2%) of graduates plan to join the military.

□ About seventy-seven percent (76.6%) of the responding graduates were working while they pursued their education at SPC, while almost twenty percent (19.7%) were employed forty hours per week or more. Almost half (48.1%) are working in areas associated with their studies.

Preparedness

Graduating students were asked to address how well prepared they were in twelve academic areas. Students believe that their education has best prepared them in "Ethical Understanding and Behavior" with a 4.3 rating on a 5-point scale. Students believe they were less prepared for "Employment after SPC" (3.8). Overall, students gave all areas of preparedness ratings above a 3.8 on a 5-point scale, which surpassed the College's criterion of three or higher on a 5-point rating scale.

By comparison, three of the twelve areas showed increases from the previous year.

Assistance Utilization

When asked the question "Did you receive any assistance to help you attend SPC from any of these programs?" About two percent (1.5%) received assistance from "Vocational Rehab", two percent (2.1%) received assistance from "Wages", one percent (1.6%) received assistance from "English as a Second Language", and almost one percent (0.8%) received assistance from "Workforce Investment Act." A total of six percent (6.0%) of responding graduates received support from these programs during the 2013-14 academic year.

SPC Recommendation

The majority (96.7%) of respondents stated that they would recommend the College to others.

Student Success

Graduating students were asked to select all the factors that assisted them in achieving student success from a list of thirteen areas. Over half of the students (55.8%) selected 'Career Goal' as a factor that impacted their success. This was followed by 'Job While in College' which was selected by over one-third (34.8%) of the students, and 'Selecting a Major' (27.3%).

Primary Reason for Time Off

When graduating students were asked: "If you took two or more consecutive semesters off from SPC, please indicate the primary reason for doing so," the most often selected reason was "Job responsibilities/schedule", which was selected by one-quarter of the students (25.7%). This was followed by "Family responsibilities including childcare," selected by twenty percent (20.1%) of the students.

Educational Outcomes

The Educational Outcomes Questionnaire was administered as part of the Graduating Student Survey. This year two thousand and eighty-two graduating students completed the questionnaire.

The primary purpose of the questionnaire is to evaluate the habits, practices and/or knowledge of graduating students in four areas: "Computer and Technology Competency", "Civic Activities", "Humanities Activities", and "Lifelong Learning" and then compare their responses to those of entering students.

The rating for this section is based on a 5-point scale with (5) representing the highest possible rating and (1) representing the lowest possible rating.

A two-tailed T-test was used to determine whether the changes in the means between the 2013-14 Entering Student Survey and the 2013-14 Graduating Student Survey were significant. Of the eleven categories, nine of the mean scores were significantly different at an alpha of .05. Moreover, all of the questions related to each of the groups exhibited improvements.

In the area of Computer and Technology Competency, students were asked to rate their competency in various computer skill areas.

to the Graduating Student Survey in 2013-14. The highest mean increase in the area of Computer and Technology Competency was "Using computer software" (+0.4).
In the area of Civic Activities, students were asked in which activities they currently participate.
 All three skill areas displayed mean increases from the Entering Student Survey to the Graduating Student Survey in 2013-14. The highest mean increase in the area of Civic Activities was "Vote in an Election" (+0.4).
In the area of Humanities Activities, students were asked in which activities they participated.

In the area of Lifelong Learning, students were asked which activities they anticipated participating in following graduation.

□ Both skill areas displayed mean increases between the Entering Student Survey and the Graduating Student Survey in 2013-14.

□ All three skill areas displayed mean increases from the Entering Student Survey

☐ The highest mean increase in the area of Humanities Activities was "Visiting an

□ The highest mean increase in the area of Lifelong Learning was "Enrolling in College or Personal Enrichment Classes" (+0.3).

Art Museum" (+0.3).

to the Graduating Student Survey in 2013-14.

SPC Mission Statement

The mission of St. Petersburg College is to promote student success and enrich our communities through education, career development and self-discovery. St. Petersburg College fulfills its mission led by an outstanding, diverse faculty and staff and enhanced by advanced technologies, distance learning, international education opportunities, innovative teaching techniques, comprehensive library and other information resources, continuous institutional self-evaluation, a climate for student success, and an enduring commitment to excellence.

Introduction

In a holistic approach, the effectiveness of any educational institution is the aggregate value of the education it provides to the community it serves. For over seventy-five years, St. Petersburg College (SPC) has provided a wide range of educational opportunities and services to a demographically diverse student body producing tens of thousands of alumni who have been on the forefront of building this county, state and beyond. This is due, in large part, to the College's institutional effectiveness.

Institutional Effectiveness

Institutional Effectiveness is the integrated, systematic, explicit, and documented process of measuring performance against the SPC mission for the purposes of continuous improvement of academic programs, administrative services, and educational support services offered by the College.

Operationally, the institutional effectiveness process ensures that the stated purposes of the College are accomplished. In other words did the institution successfully execute its mission, goals, and objectives? At SPC, the Offices of Planning, Budgeting and Research work with all departments and units to establish measurable statements of intent that are used to analyze effectiveness and to guide continuous quality improvement efforts. Each of St. Petersburg College's units is required to participate in the institutional effectiveness process.

The bottom-line from SPC's institutional effectiveness process is improvement. Once SPC has identified what it is going to do then it acts through the process of teaching, researching, and managing to accomplish its desired outcomes. The level of success of SPC's actions is then evaluated. A straightforward assessment process requires a realistic consideration of the intended outcomes that the institution has set and an

explicit evaluation of the evidence that the institution is achieving that intent.

There is no single right or best way to measure success, improvement or quality. Nevertheless, objectives must be established, data related to those objectives must be collected and analyzed, and the results of those findings must be used to improve the institution in the future. The educational assessment is a critical component of St. Petersburg College's institutional effectiveness process.

Evaluation and Assessment Processes

The evaluation and assessment processes at SPC are centered on mission-driven outcomes in the following program and service areas: (i) 28 organizational units comprising 37 academic programs (lower division); (ii) 9 Colleges and Schools comprising 24 baccalaureate programs (upper division), and (iii) key administrative and educational support services. Analysis of outcome results is on-going and captured in various assessment reports. Institutional effectiveness at SPC assesses all degree programs and courses, regardless of mode of delivery. SPC also evaluates all student services to ensure students are provided the best support possible to ensure student success.

The following are the key assessments used in the evaluation and assessment processes of SPC's Institutional Effectiveness.

- Academic Program Assessments include internally and externally developed direct measures for General Education (e.g., Educational Testing Service's Proficiency Profile [formerly MAPP]), AAS/AS Program Assessments, BAS/BS Program Assessments, and Program Reviews. Outcome results for the academic programs are documented in three types of assessment reports as follows: the Academic Program Viability Report (APVR) is completed on an annual basis; the Academic Program Assessment Report (APAR) is completed on a 3-year cycle; and the Comprehensive Academic Program Review (CAPR), which is also completed on a three-year cycle.
- Academic/Student Services Assessments include indirect measures through the Entering Student Survey, Enrolled Student Survey, Graduating Student Survey, Recent Alumni Survey, Employer Survey, and the Community College Survey of Student Engagement (CCSSE). Administrative and educational support services are evaluated annually. Results of college-wide student surveys are further refined

and augmented through additional departmental-specific assessments.

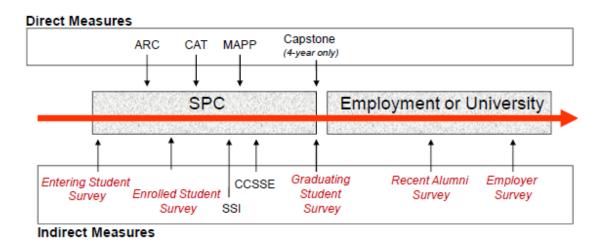

Figure 1: Student Assessment Points

Other Assessments include the President's Annual Evaluation portion of the Year-End Report on Strategic Directions and Institutional Objectives (SD-IOs), State Accountability Measures, Core Effectiveness Indicators, environmental scan/trends analysis, and other department/function-specific assessments.

Graduating Student Survey

The Graduating Student Survey (GSS) is part of a comprehensive collegewide assessment program developed to examine the demographic profile of the responding graduates, assess their perceptions of the educational experience at the College and determine how the educational process at the College has changed their behavior and/or their knowledge as it relates to some specific areas of inquiry (educational outcomes).

In 2010, an overall evaluation of the number and types of questions that students were asked upon graduating from the institution was conducted, resulting in revisions to the GSS. The new GSS is embedded in the graduation application process, and aligned with the Entering Student Survey which was revised in 2008. In an effort to minimize the overall number of questions and reduce duplication, demographic information is no longer being asked within the GSS. The demographic information for the survey was extracted from PeopleSoft, the student database system, as part of the graduation application process. The GSS was available to students applying for graduation on-line during all three terms of academic year 2013-14. Two-thousand and eighty-two students completed the survey.

The survey has seven sections and an appendix:

Section A Student Demographic and Academic Information

Section B Preparedness

Section C Assistance Utilization

Section D SPC Recommendation

Section E Student Success

Section F Primary Reason for Time Off

Section G Educational Outcomes

Appendix Survey Instrument

The ratings for Section B: Preparedness is based on a 5-point scale with (5) representing "Excellent" and (1) representing "Poor".

The rating for Section G: Educational Outcomes is based on a 5-point scale with (5) representing the highest possible rating and (1) representing the lowest possible rating. Various descriptors were used to characterize these scales depending on the specific questions asked but in all cases the scales were converted to the aforementioned numeric scale for analysis.

Student Demographic and Academic Information

The demographic profile and academic background of the 2,082 survey respondents (N) to the Graduating Student Survey are summarized in the following narrative, tables, and charts.

Age

The largest age category for survey participants was "20 - 24" (29.2%), while forty-two percent (42.3%) of survey respondents were 30 and older. By comparison, the percentage of SPC students who were 30 and older, was about thirty-six percent (35.9%) at the end of the fall 2012 semester [Source: 2013-14 Factbook, Table 20].

Table 1 Age

Age			
Aye	N	%	
19 and under	143	8.1%	
20 - 24	516	29.2%	
25 - 29	361	20.4%	
30 - 39	386	21.8%	
40 - 49	234	13.2%	
50 - 59	111	6.3%	
60 and over	18	1.0%	

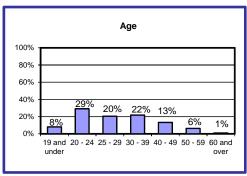

Figure 2: Age

Gender

Over two-thirds (67.9%) of the survey respondents were female. This is slightly higher than the percentage of actual female completers (61.2%) for 2012-13 [Source: 2013-14 Factbook, Table 27].

Private university or college in Florida	45	2.2%
SPC University Partnership	37	1.8%
Private university or college outside of Florida	21	1.0%
Other Community College	8	0.4%

Preparedness

Graduating students were asked to address how well prepared they were in twelve academic areas. Table 12 lists each of the twelve areas, in descending order, by mean level of perceived preparedness. Students believe that their education has best prepared them in "Ethical Understanding and Behavior" with a 4.3 rating on a 5-point scale.

The next eight preparation areas had means of four or greater which suggests that students believe they are well prepared in these areas. Students believe they were least prepared for "Employment after SPC" (3.8).

Overall, students gave all areas of preparedness ratings above 3.8 on a 5-point scale, which surpassed the College's criterion of three or higher on a 5-point rating scale.

<u>Table 12</u> Satisfaction with Preparedness

Satisfaction with Preparedness		
Please tell us how well you believe SPC has prepared you in each of the following areas:	Mean	St. Dev.
Ethical Understanding and Behavior	4.26	0.86
Courses in Your Major Area	4.25	0.89
Humanities	4.17	0.88
Composition/Writing	4.15	0.88
Communications/Speech	4.15	0.89
Social and Behavioral Sciences	4.13	0.87
Courses in a Four-Year Program	4.12	0.92
Reading	4.09	0.91
Natural Sciences	4.03	0.94
Computer Competency	3.97	0.96
Mathematics	3.91	0.99
Employment After SPC	3.82	1.11

Table 13 compares student ratings from the current year's survey (2013-14) with the previous year's survey (2012-13). Three of the twelve areas showed increases from the previous year.

<u>Table 13</u>
Satisfaction with Preparedness Differences from Last Year

Please tell us how well you believe SPC has prepared you in each of the following areas:	2012-13	2013-14	
	Mean	Mean	Difference
Ethical Understanding and Behavior	4.24	4.26	0.02
Courses in Your Major Area	4.29	4.25	-0.04
Humanities	4.19	4.17	-0.02
Composition/Writing	4.18	4.15	-0.03
Communications/Speech	4.14	4.15	0.01

Computer Competency	4.02	3.97	-0.05
Mathematics	3.94	3.91	-0.03
Employment After SPC	3.81	3.82	0.01

Assistance Utilization

When asked the question "Did you receive any assistance to help you attend SPC from any of these programs?" About two percent (1.5%) received assistance from "Vocational Rehab", two percent (2.1%) received assistance from "Wages", one percent (1.6%) received assistance from "English as a Second Language", and almost one percent (0.8%) received assistance from "Workforce Investment Act." A total of six percent (6.0%) of responding graduates received support from these programs during the 2013-14 academic year.

<u>Table 14</u>
Assistance Utilization

While at SPC did you receive assistance from any of the		
following governmental programs?	N	%
Vocational Rehab	31	1.5%
Wages	44	2.1%
English as a Second Language	33	1.6%
Title 1 Workforce Investment Act	16	0.8%

SPC Recommendation

About ninety-seven percent of respondents (96.7%) stated that they would recommend the College to others, while three percent (3.3%) stated that they would not.

<u>Table 15</u> SPC Recommendation

Would you recommend SPC to others?			
	N	%	
Yes	2004	96.7%	
No	68	3.3%	

Student Success

Graduating students were asked to select all the factors that assisted them in achieving student success from a list of thirteen areas. Over half of the students (55.8%) selected "Career Goal" as a factor that impacted their success. This was followed by "Job While in College" which was selected by over one-third (34.8%) of the students, and "Selecting a Major" (27.3%).

The two factors that students selected as having the least impact on their success were "Tutoring: Reading" (1.6%), and "Tutoring: Writing" (5.9%).

Table 16
Student Success

Which of the following impacted your success as a student? (Select all that apply)*	N	%
Career Goal	1161	55.8%
Job While in College	725	34.8%
Selecting a Major	568	27.3%
Tutoring: Math	380	18.3%

Help with Oral Communication skills	196	9.4%
Help with Computer Skills	186	8.9%
Help with Test Anxiety	166	8.0%
Tutoring: Writing	123	5.9%
Tutoring: Reading	34	1.6%

*Note: The sum of the percentages is greater than 100% due to the multiple select.

Primary Reason for Time Off

When graduating students were asked: "If you took two or more consecutive semesters off from SPC, please indicate the primary reason for doing so", the most often selected reason was "Job responsibilities/schedule", which was selected by one-quarter of the students (25.7%). This was followed by "Family responsibilities including childcare", selected by twenty percent (20.1%) of the students.

It should be noted that the majority of students (1,444) did not respond to this item.

<u>Table 17</u> *Primary Reason for Time Off*

Trinary Reason for Time Off		
Some students are unable to maintain continuous enrollment while attending SPC. If you took two or more consecutive semesters off from SPC, please indicate the primary reason for doing so.	N	%
Job responsibilities/schedule	164	25.7%
Family responsibilities including childcare	128	20.1%
Finances	127	19.9%
Health or personal problems	87	13.6%
Availability of courses	83	13.0%
Not eligible for financial aid	29	4.5%
Availability of SPC services	13	2.0%
Transportation	7	1.1%

Educational Outcomes

The Educational Outcomes Questionnaire was administered as part of the Graduating Student Survey in 2013-14. This year two-thousand and eighty-two graduating students completed the questionnaire. The primary purpose of the questionnaire is to evaluate the habits, practices and/or knowledge of graduating students in four areas: "Computer and Technology Competency", "Civic Activities", "Humanities Activities", and "Lifelong Learning", and then compare their responses to those of the entering students. The rating for this section is based on a 5-point scale with (5) representing the highest possible rating and (1) representing the lowest possible rating.

Tables 18-21 present a comparison of mean scores of the eleven educational outcome areas, which are divided into four outcomes or learning categories. A two-tailed T-test was used to determine whether the changes in the mean scores between the 2013-14 Entering Student Survey and the 2013-14 Graduating Student Survey were significant. Of the eleven categories, nine of the mean scores were significantly different at an alpha of .05. Moreover, all of the questions related to each of the learning categories exhibited improvements.

Computer and Technology Competency

In the area of Computer and Technology Competency, students were asked to rate their competency in various computer skill areas. All three skill areas displayed mean increases from the Entering Student Survey to the Graduating Student Survey in 2013-14. The highest mean increase in this area was "Using computer software" (+0.4).

<u>Table 18</u>
Computer and Technology Competency

Computer and Technology Competency	2013-14		
Please rate your competency in the following skill areas (5-point scale).	Entering Mean	Graduating Mean	Mean Difference
Using computer software (Word Processing, etc.)	3.92	4.36*	+0.44
Conducting research through the Internet	4.40	4.60*	+0.20
Communicating through the Internet (e-mail, chat, etc.)	4.54	4.67*	+0.13

^{*}Significant difference from Entering to Graduating at Alpha = 0.05

Civic Activities

In the area of Civic Activities, students were asked in which activities they currently participate. All three skill areas displayed mean increases from the Entering Student Survey to the Graduating Student Survey in 2013-14. The highest mean increase in the area of Civic Activities was "Vote in an Election" (+0.4).

<u>Table 19</u> *Informed and Responsible Citizens*

Civic Activities	2013-14		
In what activities do you currently participate? (5-point scale).	Entering Mean	Mean Difference	
Vote in an election	3.16	3.56*	+0.40
Volunteer in community service activities	2.86	2.99*	+0.13
Participate in campaigns or forums	1.80	1.99*	+0.19

^{*}Significant difference from Entering to Graduating at Alpha = 0.05

Humanities Activities

In the area of Humanities Activities, students were asked in which activities they participated. All three skill areas displayed mean increases from the Entering Student Survey to the Graduating Student Survey in 2013-14. The highest mean increase in the area of Humanities Activities was "Visiting an Art Museum" (+0.3).

<u>Table 20</u> *Humanities Activities*

Humanities Activities	2013-14			
In which of the following activities do you participate? (5-point scale).	Entering Graduating Mean Mean Mean Differen			
Visiting an art museum	2.46	2.74*	+0.28	
Attending a concert, dance performance or live drama	2.96	2.97	+0.01	
Creating a painting, sculpture or other work of visual art	2.30	2.33	+0.03	

^{*}Significant difference from Entering to Graduating at Alpha = 0.05

Lifelong Learning

In the area of Lifelong Learning, students were asked which lifelong learning activities they anticipated participating in following graduation. Both skill areas displayed mean increases from the Entering Student Survey to the Graduating Student Survey in 2013-14. The highest mean increase in the area of Lifelong Learning was "Enrolling in College or Personal Enrichment Classes" (+0.3).

Table 21 Lifelong Learning

Lifelong Learning Which of the following life-long	2013-14 Entering Graduating Mean Mean Difference				
learning activities will you participate in following graduation? (5-point scale).					
Enrolling in college or personal enrichment classes	3.33	3.62*	+0.29		
Participating in continuing education	3.70 3.92* +0.22				

^{*}Significant difference from Entering to Graduating at Alpha = 0.05

Table 22 displays the five education outcomes areas with the largest mean increases between the 2013-14 Entering Student Survey and the 2013-14 Graduating Student Survey. The greatest individual improvement was in the category "Word Processing" where graduating students scored a 0.4 point improvement over the entering students.

<u>Table 22</u> <u>Education Outcomes with Greatest Improvement</u>

Please rate your competency in the following skill	2013-14			
areas (5-point scale).	Entering Mean	Graduating Mean	Difference	
Using computer software	3.92	4.36*	+0.44	
Vote in an election	3.16	3.56*	+0.40	
Enrolling in college or personal enrichment classes	3.33	3.62*	+0.29	
Visiting an art museum	2.46	2.74*	+0.28	
Participating in continuing education	3.70	3.92*	+0.22	

^{*}Significant difference from Entering to Graduating at Alpha = 0.05

Note: Data are displayed using two decimal places due to the proximity of the values.

Nine of the eleven areas resulted in a statistically significant increase in mean scores between the 2013-14 Entering Student and Graduating Student Surveys.

Table 23 displays the five education outcomes areas with the smallest mean increases between the 2013-14 Entering Student and Graduating Student Surveys. The smallest individual improvement was in the category "Attend a concert, dance, performance, or live drama" where graduating students scored a 0.01 point improvement over the entering students.

<u>Table 23</u> <u>Education Outcomes with Smallest Improvement</u>

Please rate your competency in the	2013-14				
following skill areas (5-point scale).	Entering Mean	Graduating Mean	Difference		
Attend a concert, dance performance, or live drama	2.96	2.97	+0.01		
Creating a painting, sculpture, or other work of visual art	2.30	2.33	+0.03		
Email	4.54	4.67*	+0.13		
Volunteer in community service activities	2.86	2.99*	+0.13		
Participating in campaigns or forums	1.80	1.99*	+0.19		

^{*}Significant difference from Entering to Graduating at Alpha = 0.05

Conclusion

St. Petersburg College (SPC) developed the Graduating Student Survey (GSS) as part of a comprehensive college-wide assessment program. The key purposes of the GSS is to examine the demographic profile of the responding graduates, assess their perceptions of the educational experience at the College and determine how the educational process at the College has changed their behavior and/or their knowledge as it relates to four educational outcome areas.

SPC students believe that their education has best prepared them in "Ethical Understanding and Behavior," "Courses in Your Major Area," "Humanities," and "Composition/Writing." Nine areas scored a four or greater on the 5-point rating scale. Students believe they were less well prepared for "Employment after SPC" (3.8). Nevertheless, students gave all areas of preparedness ratings above 3.8 on a 5-point scale, which indicates that they are well satisfied with the preparation they received in all these academic areas.

About ninety-seven percent of students would recommend the College to others. Seventy-two percent of students were fully satisfied with the educational goals they achieved while at the College and twenty-seven percent were somewhat satisfied.

Over half of the students (55.8%) selected "Career Goal" as a factor that impacted their success. This was followed by "Job While in College" which was selected by over one-third (34.8%) of the students, and "Selecting a Major" (27.3%).

Graduating students were asked to complete an education outcomes questionnaire and the responses were compared with those of the Entering students to gauge how the educational experience at SPC has impacted students in eleven individual categories divided into four educational outcomes areas. The rating for "Educational Outcomes" is based on a 5-point scale with five representing the highest possible rating and one representing the lowest possible rating. A two-tailed T-test was used to determine whether the changes in the mean scores between the 2013-14 Entering Student Survey and the 2013-14 Graduating Student Survey were significant. Of the eleven categories, nine of the mean scores were significantly different at an alpha of 0.05. Moreover, each of the eleven defined groupings showed improvements between the 2013-14 Entering Student and Graduating Student Surveys.

Appendix: Graduating Student Survey

Graduating Student Survey 2013-14

In order to understand the needs and expectations of our students and improve College Services, we would like your opinion about certain key areas and activities of SPC.

This survey can be completed and submitted ONLY once.

Please complete the questionnaire below and click Submit.

2.	Did you	achieve	your	educational	goal	while	attending	SPC?

3. Would you recommend SPC to others?

•

•

4.	Do you	nlan to	attend	another	college	or universit	v?

•

5. If you answered, "Yes" to the above question, what college will you be attending (If not listed, please specify in the space below)?

6. Do you plan to enter the military?

7.	What is your employment status?
	×
3.	If employed, is your employment related to your studies?
	•
).	Which award are you applying for?
0.	While at SPC did you receive assistance from any of the following government
	programs?
	•
	Career goal Job while in college Job after graduation Selecting a major Career guidance Internship Help with study skills Help with computer skills Help with oral communication skills Help with test anxiety Tutoring: Math Tutoring: Writing Tutoring: Reading
12.	Some students are unable to maintain continuous enrollment while attending SPC. If you took two or more consecutive semesters off from SPC, please indicate the primar reason for doing so

areas: Reading	us how well you believe SPC has prepared you in each of the following
14. Composition	on/Writing
15. Communic	eation/Speech
16. Computer	Competency
17. Ethical Un	derstanding and Behavior
18. Humanitie	s (awareness of different philosophies, cultures, arts and music)
	•
19. Social and	Behavioral Sciences (Economics, Psychology, Government, etc.)
	•
20. Natural Sc	iences (Biology, Chemistry, Earth Science, etc.)
	•
21. Mathemati	cs

22. Courses in your major	area
23. Courses in a four-year	program
24. Employment after SPC	•
Please rate your level of	echnology Competency of competency in each of the following skill areas. re (word processing, spreadsheets, etc.)
26. Communicating through	h the Internet (email, chat, instant messaging, etc.)
27. Acquiring information/c	onducting research through the Internet
28. Civic Activities How often do you partie Vote in an election	cipate in the following activities?
29. Volunteer in community	y service activities
30. Participate in campaigr	ns or forums

How o	nanities Activities Iften do you participate in the following activities? If a concert, dance performance, or live drama
	•
32. Visit a	n art museum
	•
33. Create	e a painting, sculpture, or other work of art
How o	-long Learning often do you participate in the following activities? ipate in continuing education
	•
