Executive Summary

Introduction

The evaluation and assessment processes at St. Petersburg College (SPC) are centered on mission-driven outcomes in program and service areas. Analysis of outcome results is ongoing and captured in various assessment reports. Institutional effectiveness at SPC assesses all degree programs and courses, regardless of mode of delivery.

Graduating Student Survey

The Graduating Student Survey (GSS) is part of a comprehensive college-wide assessment program developed to examine the demographic profile of the responding graduates, assess their perceptions of the educational experience at the College and determine how the educational process at the College has changed their behavior and/or their knowledge as it relates to some specific areas of inquiry (general educational outcomes).

During summer 2023, a revision committee was convened with the purpose of updating the GSS. As a result of the committee's efforts, existing survey questions were revised and others regarding student experiences were incorporated into the survey. To further streamline the GSS process, all student data were gathered using SurveyMonkey. To ensure the correct subpopulation was being surveyed, a graduation list was provided of students who were identified as eligible for graduation. Once identified, these students were prompted to complete the survey through the St. Petersburg College Titan Hub, as a task.

Of the three thousand, three hundred and seventy students (3,370) eligible to complete the survey, eight hundred and twenty students (820) responded to the survey during the 2023-24 academic year for a response rate of 24%.

Student Demographic Information

Over one quarter of survey respondents (27%) were 20 to 24 years of age, and over two-thirds of survey respondents were female (70%).

Over half (58%) of survey respondents selected White/Non-Hispanic as their ethnicity. The next two largest categories were Black/Non-Hispanic with (16%) and Hispanic with (15%).

Forty-four percent (44%) of survey respondents were receiving an Associate in Arts degree, followed by twenty-four percent (24%) receiving an Associate in Science degree.

Nearly four-fifths (79%) of survey respondents indicated they planned to continue their education. Respondents who indicated they planned to continue their education were asked which college or university they would be attending. Nearly half (46%) indicated a college or university in Florida other than St. Petersburg College, followed by St. Petersburg College (40%).

Over four-fifths (88%) of survey respondents indicated that they were working while attending SPC, with over half (53%) working 31 hours or more. Nearly half (49%) of survey respondents reported being employed in a career related to their field of study.

Educational Experience

Respondents were asked to identify which factors impacted their success as a student by selecting from a roster of categories. The five most frequently selected factors were "Working While in College" (53%), "Study Skills" (47%), "Physical/Mental Health" (38%), "Career Goal" (37%), and "Finances" (33%).

Respondents who selected tutoring as a factor that impacted their success were asked to identify the type of tutoring. Almost three-quarters (72%) selected "Tutoring: Math," followed by "Tutoring: Writing" (39%) and "Other" (20%).

Respondents were asked what circumstances prevented them from enrolling full-time if they would have preferred to do so. Nearly half (47%) answered that the question was not applicable as they were enrolled full-time, followed by "Job Responsibilities/Schedule" (25%) and "Finances" (11%).

Nearly all (98%) of the respondents would recommend St. Petersburg College.

Preparation

Students were asked to indicate their level of preparation in various academic and career areas on a 5-point scale, with 5 being the highest rating. An "N/A" response was available if a respondent felt the area of preparation did not apply.

In the college/academic areas, there was a 0.22 spread among all preparation scores, ranging from "Critical Thinking" (4.53) to "Quantitative Reasoning - Mathematics" (4.31).

In the career areas, there was a 0.29 spread among all preparation scores, ranging from "Career Readiness Skills" (4.10) to "Connection to Employers" (3.81).

General Education Outcomes

The Educational Outcomes Questionnaire was administered as part of the Graduating Student Survey. The primary purpose of the questionnaire is to evaluate the habits, practices and/or knowledge of incoming students in three areas: Computer and Technology Competency, Civic Activity, and Humanities.

In the area of Computer and Technology Competency, students were asked to rate their competency in three computer skill areas. Over four-fifths of students rated their skills as "Highly proficient" or "Somewhat Proficient" in all three areas: "Communicating through the Internet (email, chat, instant messaging, etc.)" (91%); "Acquiring information/conducting research through the Internet" (91%) and "Using computer software (word processing, spreadsheets, etc.)" (86%).

In the area of Civic Activities, students were asked how often they participated in various activities each year. Of the six activities, "Vote in an election" received the highest percentage of survey respondents who indicated they would participate "Whenever Possible" (35%). Survey respondents largely never participated in the following activities: "Participate in campaigns, public debates, or assisting with voter registration" (71%), "Volunteer with others from SPC for one-time community service activities" (58%), "Courses that include community service activities" (53%), "Community involvement through a campus organization or club" (49%), and "Engage in activities with people

whose religious, political, racial, cultural, economic and/or other characteristics are different than your own" (37%).

In the area of Humanities Activities, students were asked how often they participated in three different activities. Of the three activities, nearly one-third of survey respondents indicated that they would "Create: painting, drawing, sculpture, digital art, video, music, or other creative works" (31%) "Whenever Possible" or "Frequently." This was followed by over one-quarter of students who indicated that they would "Attend a concert, musical event, dance performance, play, live drama, or performing arts event" (28%) or "Visit an art museum, gallery, art show, experience public art (murals, sculptures, installations)" (26%) "Whenever Possible" or "Frequently."

SPC Mission Statement

The mission of St. Petersburg College is to empower our students and community to achieve success and economic mobility through academic excellence and engagement.

St. Petersburg College fulfills this mission led by an outstanding, diverse faculty and staff and enhanced by advanced technologies, distance learning, international education opportunities, innovative teaching techniques, comprehensive library and other information resources, continuous institutional self-evaluation, a climate for student success, and an enduring commitment to excellence.

Introduction

In a holistic approach, the effectiveness of any educational institution is the aggregate value of the education it provides to the community it serves. For nearly 100 years, St. Petersburg College (SPC) has provided a wide range of educational opportunities and services to a demographically diverse student body producing tens of thousands of alumni who have been on the forefront of building this county, state and beyond. This is due, in large part, to the College's institutional effectiveness.

Institutional Effectiveness

Institutional Effectiveness is the integrated, systematic, explicit, and documented process of measuring performance against the SPC mission for the purposes of continuous improvement of academic programs, administrative services, and educational support services offered by the College.

Operationally, the institutional effectiveness process ensures that the stated purposes of the College are accomplished. In other words, did the institution successfully execute its mission, goals, and objectives? At SPC the Department of Institutional Effectiveness, along with the Strategic Planning Office, works with all departments and units to establish measurable statements of intent that are used to analyze effectiveness and to guide continuous quality improvement efforts. Each of St. Petersburg College's units is required to participate in the institutional effectiveness process.

The bottom-line from SPC's institutional effectiveness process is improvement. Once SPC has identified what it is going to do then it acts through the process of teaching, researching, and managing to accomplish

its desired outcomes. The level of success of SPC's actions is then evaluated. A straightforward assessment process requires a realistic consideration of the intended outcomes that the institution has set and an explicit evaluation of the evidence that the institution is achieving that intent.

There is no single right or best way to measure success, improvement, or quality. Nevertheless, objectives must be established, data related to those objectives must be collected and analyzed, and the results of those findings must be used to improve the institution in the future. The educational assessment is a critical component of St. Petersburg College's institutional effectiveness process.

Evaluation and Assessment Processes

The evaluation and assessment processes at SPC are centered on mission-driven outcomes for its 12 Colleges and Schools comprised of 36 associate in science degrees, 1 associate in arts degree, 22 baccalaureate programs, and a variety of certificates and short-term training opportunities, as well as key administrative and educational support services. It is important to note the 2023-24 survey results are only representative of those academic programs with graduates eligible to take the survey. Analysis of outcome results is on-going and captured in various assessment reports. Institutional effectiveness at SPC assesses all degree programs and courses, regardless of mode of delivery. SPC also evaluates all student services to ensure students are provided the best support possible to ensure student success.

The following are the key assessments used in the evaluation and assessment processes of SPC's Institutional Effectiveness.

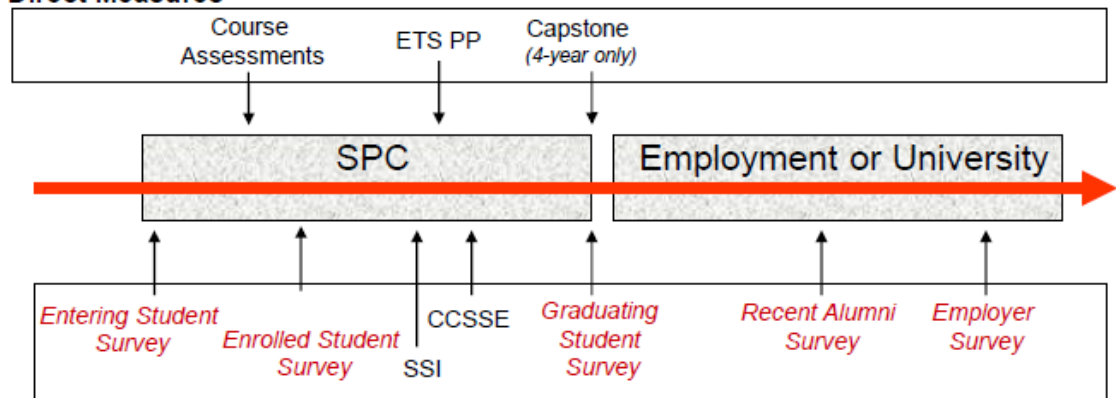

- Academic Program Assessments include internally and externally developed direct measures for General Education (e.g., Educational Testing Service's Proficiency Profile [PP]), AS Program Assessments, BAS/BS Program Assessments, and Program Reviews. Outcome results for the academic programs are documented in two types of assessment reports as follows: the Academic Program Viability Report (APVR) is completed on an annual basis and the Academic Program Assessment Report (APAR), which is completed on a three-year cycle.
- Administrative/Student Services Assessments include direct and indirect measures through Services Assessments, and the Entering Student Survey, Enrolled Student Survey, Graduating Student Survey,

Institutional Effectiveness

Recent Alumni Survey, Employer Survey, and the Community College Survey of Student Engagement (CCSSE). Administrative and educational support services are evaluated annually via these surveys. Results of college-wide student surveys are further refined and augmented through additional departmental-specific assessments.

Direct Measures

Indirect Measures

Other Assessments include the State Accountability Measures, environmental scan/trends analysis, other department/function-specific assessments, and various ad hoc surveys.

Graduating Student Survey

The Graduating Student Survey (GSS) is part of a comprehensive college-wide assessment program developed to examine the demographic profile of the responding graduates, assess their perceptions of the educational experience at the College and determine how the educational process at the College has changed their behavior and/or their knowledge as it relates to some specific areas of inquiry (general educational outcomes).

During summer 2023, a revision committee was convened with the purpose of updating the GSS. As a result of the committee's efforts, existing survey questions were revised and others regarding student experiences were incorporated into the survey. To further streamline the GSS process, all student data were gathered using SurveyMonkey. To ensure the correct subpopulation was being surveyed, a graduation list was provided of students who were identified as eligible for graduation. Once identified, these students were prompted to complete the survey through the St. Petersburg College Titan Hub, as a task.

Of the three thousand, three hundred and seventy students (3,370) eligible to complete the survey, eight hundred and twenty students (820) responded to the survey during the 2023-24 academic year for a response rate of 24%.

The survey has five major sections:

- Section A Student Demographic Information
- Section B Educational Experience
- Section C Preparation
- Section D Experiences
- Section E General Education Outcomes

Student Demographic Information

The demographic profile and academic information of the 820 survey respondents (N) to the Graduating Student Survey are summarized in the following narratives, tables, and charts.

Age

Over one quarter (27%) of survey respondents reported that they were 20 to 24 years old, followed by 30 to 39 (24%) and 25 to 29 (15%). Forty percent (40%) of respondents were under the age of 25.

Preparation

Students were asked to indicate their level of preparation in various academic and career areas on a 5-point scale, with 5 being the highest rating. An "N/A" response was available if a respondent felt the area of preparation did not apply. Tables 14 and 15 show the students' ratings college-wide on the preparation in these areas.

College Preparation

In the college / academic areas, there was a 0.22 spread among all preparation scores, ranging from "Critical Thinking" (4.53) to "Quantitative Reasoning - Mathematics" (4.31).

Experiences

SPC Experiences

Respondents were asked to think about their experiences with SPC from the time of their decision to attend SPC through their last semester.

Over four-fifths of survey respondents indicated they Strongly Agree or Agree with the following statements: "I felt comfortable reaching out to someone at the College if I had a question" (82%), and "I believe my time at SPC helped me develop the skills and knowledge to reach my goals" (86%). Over two-thirds of survey respondents indicated they Strongly Agree or Agree with the following statement: "I felt a sense of belonging at SPC" (67%).

General Education Outcomes

Students were asked to evaluate their competency or participation using a five-point Likert scale (five points was the highest rating) in the following General Education areas.

Computer and Technology Competency

Respondents were asked to rate their competency in three computer skill areas. Over four-fifths of respondents rated their skills as "Highly Proficient" or "Somewhat Proficient" in all three areas: "Communicating through the Internet (email, chat, instant messaging, etc.)" (91%), "Acquiring information / conducting research through the Internet" (91%), and "Using computer software (word processing, spreadsheets, etc.)" (86%).

Participation in Humanities Activities

In the area of Humanities Activities, respondents were asked how often they participate in three different activities. Of the three activities, nearly one-third of survey respondents indicated that they would "Create: painting, drawing, sculpture, digital art, video, music, or other creative works" (31%) Whenever Possible or Frequently. This was followed by over one-quarter of students who indicated that they would "Attend a concert, musical event, dance performance, play, live drama, or performing arts event" (28%) or "Visit an art museum, gallery, art show, experience public art (murals, sculptures, installations)" (26%) Whenever Possible or Frequently.

Conclusion

St. Petersburg College (SPC) developed the Graduating Student Survey (GSS) as part of a comprehensive college-wide assessment program. The key purposes of the GSS is to examine the demographic profile of the responding graduates, assess their perceptions of the educational experience at the College and determine how the educational process at the College has changed their behavior and/or their knowledge as it relates to four educational outcome areas.

SPC students believe that their education has best prepared them in “Critical Thinking,” “Ethical Reasoning and Values,” and “Written Communication.” Ten areas scored a 4.0 or greater on the 5-point rating scale. Students believe they were less well prepared for “Connection to Employers” (3.8). Nevertheless, students gave all areas of preparation a minimum of 3.8 on a 5-point scale, which indicates that they are well satisfied with the preparation they received in all these academic and career areas.

Nearly all students would recommend St. Petersburg College to others.

More than half of the students (53%) selected “Working While in College” as a factor that impacted their success. This was followed by “Study Skills” (47%), “Physical/Mental Health” (38%), “Career Goal” (37%), and “Finances” (33%).

Students were asked to rate their competency in three computer skill areas. Over four-fifths of respondents rated their skills as “Highly proficient” or “Somewhat Proficient” in all three areas: “Communicating through the Internet (email, chat, instant messaging, etc.)” (91%); “Acquiring information/conducting research through the Internet” (91%) and “Using computer software (word processing, spreadsheets, etc.)” (86%).

In the area of Civic Activities, students were asked how often they participated in various activities each year. Of the six activities, “Vote in an election,” received the highest percentage of survey respondents who indicated they would participate “Whenever Possible” (35%). Survey respondents largely never participated in the following activities: “Participate in campaigns, public debates, or assisting with voter registration” (71%), “Volunteer with others from SPC for one-time

community service activities" (58%), "Courses that include community service activities" (53%), "Community involvement through a campus organization or club" (49%), and "Engage in activities with people whose religious, political, racial, cultural, economic and/or other characteristics are different than your own" (37%).

In the area of Humanities Activities, students were asked how often they participated in three different activities. Of the three activities, nearly one-third of survey respondents indicated that they would "Create: painting, drawing, sculpture, digital art, video, music, or other creative works" (31%) "Whenever Possible" or "Frequently." This was followed by over one-quarter of students who indicated that they would "Attend a concert, musical event, dance performance, play, live drama, or performing arts event" (28%) or "Visit an art museum, gallery, art show, experience public art (murals, sculptures, installations)" (26%) "Whenever Possible" or "Frequently."

These results can be helpful to better align college efforts to the needs and expectations of incoming students.
